About me

I am a passionate full stack developer who craves perfection and talented group of people to work with. I have 4+ years of work experience but my programming journey started a long time ago during my high-school. I started with JavaScript, HTML, and CSS as an optional subject in the year 2005. Since then I have picked up many different languages and frameworks along the way.

Work Experience

Freelancing – Indore, India - Full Stack Developer 01/2019–Present

I am currently working on the project of my own and some client projects. These projects involve use of Python, Django, Django REST, JavaScript (ES6), ReactJS, Redux, Celery, RabbitMQ, Redis, AWS.

FeelRobotics – Amsterdam, Netherlands - Full Stack Developer 01/2018–01/2019

I worked on a diverse technical stack of Ruby on Rails, Django, Django REST, Flask, ReactJS, Redux, AWS and Heroku. We used CircleCI for continuous integration. I did lead a project based on React-Redux and Django. I was also code owner of important Django and RoR projects.

Freelancing – Indore, India - Full Stack Developer 01/2017–01/2018

I did work on multiple projects which mostly were Ruby on Rails based along with React. I also had a chance to work with PHP, CodeIgniter, and JSP.

Indian Students Association at ISU – Normal, USA – Webmaster 08/2014–08/2015

Worked with WordPress and JavaScript to develop and maintain the organization's website.

Education

Illinois State University – Normal, USA 2014 - 2016

Master of Science in Information Systems. Along with the MS graduate degree I also received a graduate certificate of *Internet Application Development* and *System Analyst*.

Maulana Azad National Institute of Technology – Bhopal, India 2009 - 2013

Bachelor of Technology in Computer Science and Engineering. This helped me a lot in building a solid foundation for object-oriented programming, relational databases, software development process.
